Pairing Your Phone

Pair your phone when the vehicle is stopped to begin using hands-free phone and related audio functions. System. Phone synchronization must be on for this feature to work.

Dialing a Number

Enter a 10-digit phone number to call.

Using HFL

Press the Pick-Up button to end or the call.

Press the End button to accept or decline the call.

A notification is heard and the incoming call information appears on the display.

To reduce the potential for driver distraction, certain manual functions may be inoperable or grayed out while the vehicle is moving. Voice commands are always available.

Using the Phonebook

Pairing an additional phone

Select Device Not Found and search for your phone when it appears on the list.

If your phone does not appear:

• Select Device Not Found and search for your phone again.

• Manually dial your phone number.

• Clear HFL information in the MID, or cancel pairing your phone.

4. The system asks if you want to enable Phone Synchronization. Select On to automatically import contacts and phone numbers from your phone.

6. HFL searches for your phone. Select your phone when it appears on the list.

7. HFL gives you a six-digit code. Compare it to the code that appears automatically on your phone. Connect to HFL from your phone.

8. The system asks if you want to enable Phone Synchronization. Select On to automatically import contacts and phone numbers from your phone.

Using Voice Commands

Press and release the Talk button to say a command.

Using the ODMD

Use the interface dial to make and enter selections.

Using the Phone Screen*

Select items by touch.

Using the Menu*

Press and release the Talk button to say a command.

Using the ODMD*

Press and release the Talk button to say a command.

Assigning operations in the HFL system is programmable. Important features and functions can be set up in the HFL system for the driver while the vehicle is moving.
