LANE DEPARTURE WARNING (LDW)
Alerts you if your vehicle begins to move out of a detected lane without the turn signal activated.
Available with Standard and Technology Packages.

How It Works
A camera mounted between the windshield and the rearview mirror determines if your vehicle begins to move away from the center of a detected lane while driving between 40–90 mph.

Turning LDW On or Off
Press LDW to turn the system on or off. A green indicator light appears on the button when the system is on.

LDW may not activate under certain conditions. See your Owner's Manual for more information.

LANE KEEPING ASSIST SYSTEM (LKAS)
Alerts you if your vehicle begins to move out of a detected lane and helps with steering operation. Available with Advance Package.

How It Works
A camera mounted between the windshield and the rearview mirror determines if your vehicle begins to move away from the center of a detected lane while driving between 45–90 mph.

Turning LKAS On or Off
1. Press MAIN. LKAS appears in the MID.
2. Press the LKAS button. Lane outlines appear in the MID. Dotted lane lines turn solid when the system operates.

Press MAIN or the LKAS button to turn the system off.

LKAS may not activate under certain conditions. See your Owner’s Manual for more information.
